

OD-28S | Power Sequencer

Features

- The power sequencer is used to manage a PA system's power requirements so that it may turn on up to 16 system components according to the order that is desired-effectively preventing high powered equipment from overloading the AC mains.
- The power sequence can be started by the DCI-16T II programmable timer, thus giving an even greater degree of control. The DCI-28S II has a total capacity of 2KW.

Technical Specification

- Channels : 16 Channels (CH1-CH16)
- Input : AC 220V, 20A
- Output : 280W / Channel
- Sequence Interval : 0.4S-0.5s
- Power Heading : 2kW total capacity
- Controls : Power On/Off switch
- Power Consumption : 25-30 W
- Indicators : Power, CH1-CH16, TIMER
- Power Requirements : AC 220V +/- 10% 50-60 Hz
- Dimensions : 133 (H) x 483 (W) x 390 (D) mm
